Subject: RE: For HQ review: Wolverine results letter

Hi Nancy and Peter:

Set forth below is a summary of the results from the 16 Wolverine-impacted homes that EPA/SFD sampled in late December. The chart only shows info on PFOS/PFOA; it does not reflect any of the 14 other PFAS compounds that were sampled for or detected (and which are not subject to any sort of health advisory). The results for these other PFAS compounds will be provided to the residents.

Please note these results are being quality checked by Superfund's consultant now so they are not final, but they will most likely not change very much after the quality check is completed. Some other important notes:

- Five homes were above the health advisory before a filter. Two homes were above the health advisory without a filter. That is a total of seven out of 16 homes above the health advisory.
- The homes that are over the PFOA/PFOS health advisory that do not have filters are, according to Superfund's consultant, receiving bottled water.
- In instances where either the PFOA or PFOS concentration was ND, I assumed the concentration of the compound that was not detected is zero. Even if the detection limit had been assumed at these homes, additional homes would not be over the health advisory.

Any Qs, please advise. Tx.

Chris

Results Are Combined PFOA-PFOS Results Reported in ng/L

Home Number	Pre-filter	Post-filter Drinking Water	Pre-filter Duplicate Sample	(No filter) drinking water result	(no filter) drinking water duplicates
1	Non-detect (ND)	ND			
2	368	6			
3	ND	5			
4	640	ND	640		
5	ND	2			
6	335	7			
7	5300	ND	5600		
8	33	20			

9	9700	2			
10				ND	ND
11				ND	ND
12				672	
13	ND	ND			
14	24	ND			
15	20	ND			
16				73
